

SAFETY CULTURE - Small Operator's Perspective

**The Characteristics of
Natural Gas do not
Change with the Size
of the Operator...**

No Place for Wimps

“assertively optimize leading-edge imperatives”

“uniquely exploit sustainable methods of empowerment”

“credibly reinvent resource-leveling imperatives”

“holistically incentivize enterprise-wide quality vectors”

“synergistically impact stand-alone relationships”

Same planet, different world...

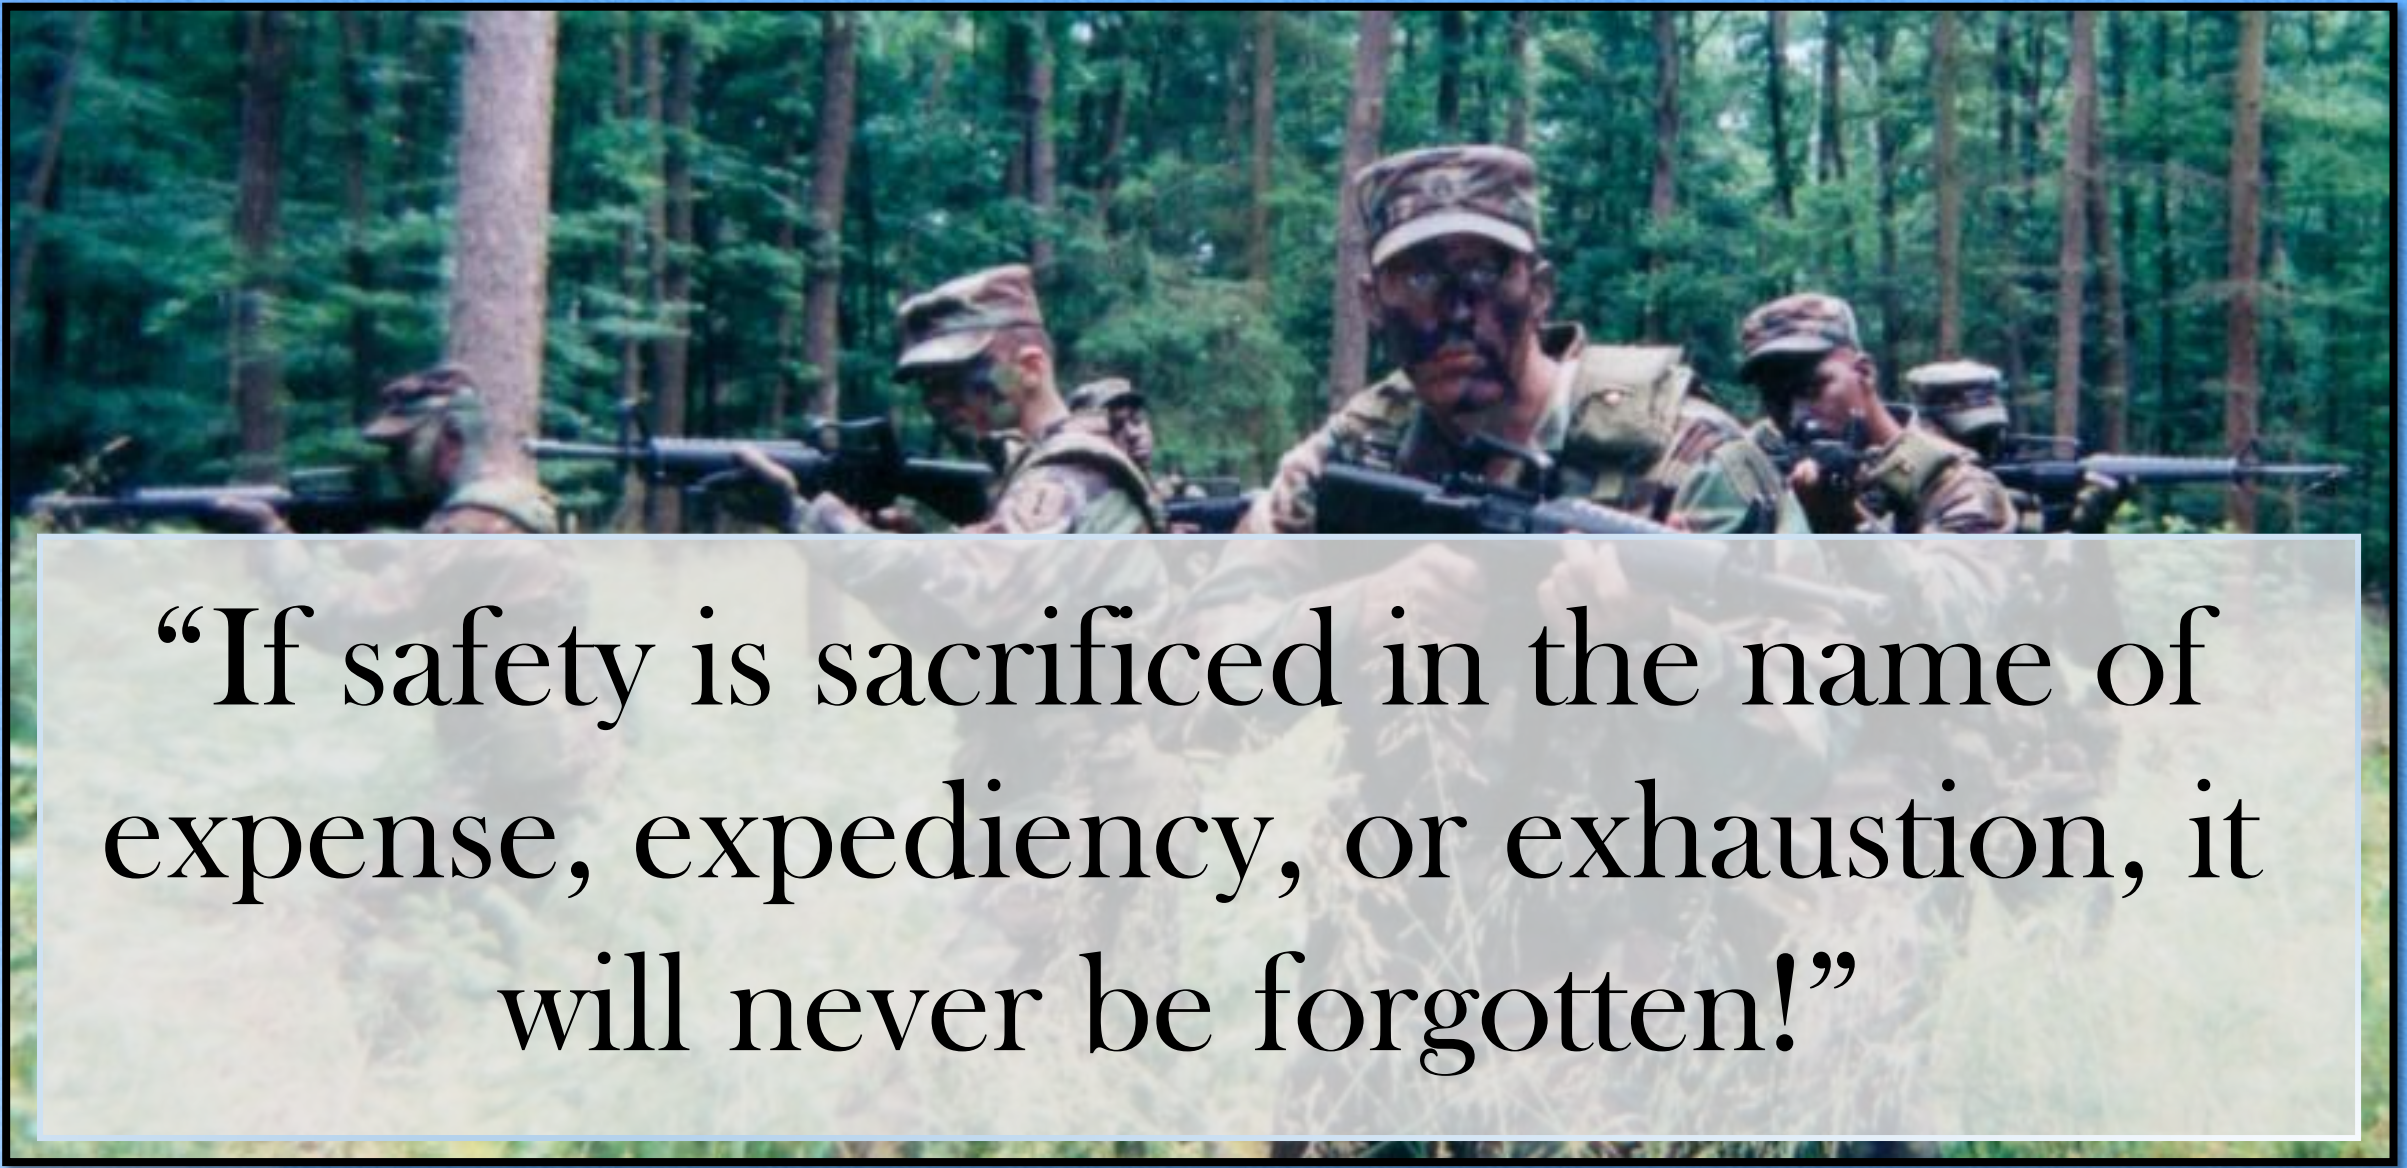

**In a galaxy far,
far, away...**

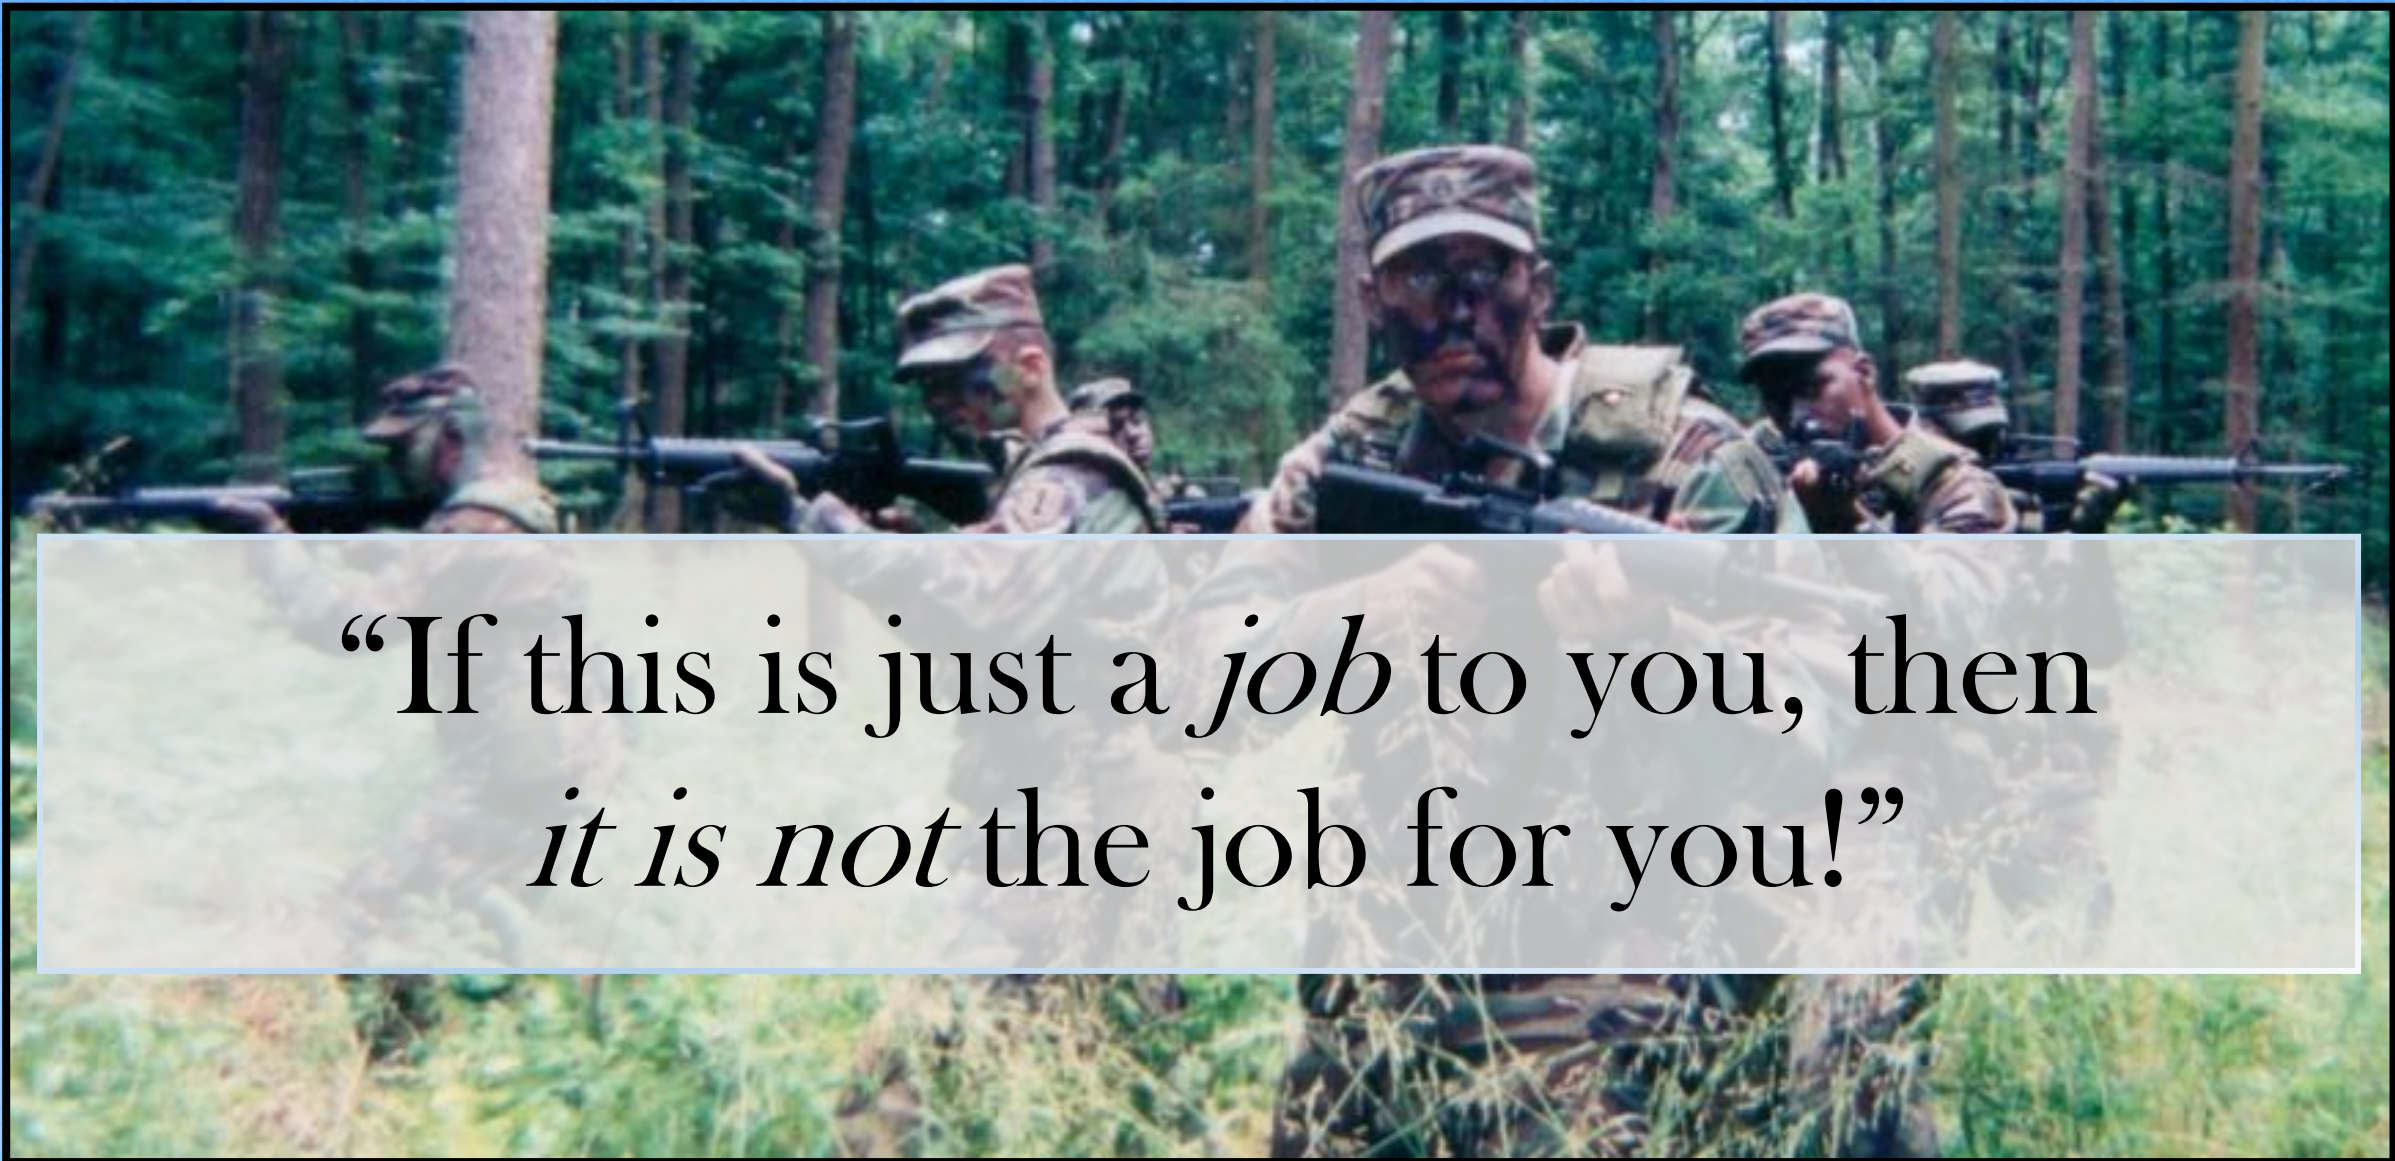

“You Can Fool Your Superiors, But You
Can Never Fool Your Subordinates!”

“If safety is sacrificed in the name of expense, expediency, or exhaustion, it will never be forgotten!”

A photograph of several soldiers in camouflage uniforms and berets, holding rifles, positioned in a dense forest. The image is slightly blurred, giving it a candid, action-oriented feel. A semi-transparent white rectangular box is overlaid in the center, containing a quote in a serif font.

“If this is just a *job* to you, then
it is not the job for you!”

NEGATIVES

x 10

We're pressed for time.

Make do with what you have.

Figure out a way to make it work.

POSITIVES

x 1

Do it right the first time.

Plan for what if.

This is ***your*** pipeline.

Safety First,
Yes.

Screw that,
Just
Git-R-Done!

Safety First,
Yes.

**Come to the
Dark Side!**

Remember
your
training!
